Expert sounds warning on global overfishing

The world's oceans are being overfished to such an extent that humans are starting to eat fish that previous generations would have discarded as inedible, says Daniel Pauly, one of the world's leading fisheries conservation scientists.

Registered 7-day subscribers to the *Times Colonist* newspaper or electronic edition will enjoy full access to all **TimesColonist.com** content.

Plus as an added value, you will also have full access to the subscriber exclusive content at all of our newspaper websites. For a complete listing see "Newspapers" below.

» [I am a Times Colonist 7-day subscriber and need to register](#)

» [I would like to find out more about the benefits of subscribing](#)

Non-subscribers can still read a selection of **Times Colonist Online** stories and access all features on [canada.com](#). For more information, customerservice@tc.canwest.com or call us at 1-800-663-6384.
